Important instructions for uploading Soil samples Excel files to the SIS

The file to be uploaded must have four sheets:

1. General and Surface

2. Layer description

3. Lab data

The data in sheets 1 and 2 must start from line 10 and line 6 respectively, and the data in sheets 3 and 4 must start from line 3.

Before uploading the file, ensure that the data in Excel is in 'value' format and that no fields have been filled in with formulas or text formatting rule; otherwise, SIS will return errors:

Error msg	Possible soultion
Wrong Classification code field	The classification code in the cell is unknow by the SIS
Wrong Number field	the value in the cell isn't a number Check if the cell contains a formula instead a value
Wrong Boolean field	The value in the cell isn't a Boolean. Allowed values T for True, F for False' Check if the cell contains a formula instead a value
